

Team History and Personal Galleries

Contributed by Team Slam Web
Sunday, 05 August 2007

Hello all,

We now have 16 registered users on the team website. Some members are asking about the team history and how to upload personal images. To be brief, the history or "About Us" section is currently under construction by our Team Leaders. I have enabled comments under the About Us section to allow all members to add comments and bits of their history with Team Slam since the Owls and Eagles. George has added commentary to assist with the history and others "new and old" members can give their history as well. Once the ethnography is complete we should have a very unique and very exciting story for all to enjoy.

For users and members with photos, music, or movies they want to share follow the simple steps to upload your files.

Step 1. Register or login to the site with your username and password.

Step 2. Click onto the Galleries tab.

Step 3. Click on the "Your Album" link in the upper right corner of the galleries.

Step 4. If you want to create albums click "Album" at the end of "Add Items - Albums" link. Fill out album information and click "create" button at bottom of form. Other wise go to step 5 for item upload without creating albums.

Step 5. Upload items by entering Album you want the files and clicking on the "Items" in the "Add Items - Albums" link. Or use one of the drop-down menus or menus along the left side of the gallery. Explore Your Options!

Step 6. Choose upload option (preferred), or send Terry or Lynn and email with images (not preferred) and Terry will do the uploads as time allows.

NOTE: Easy options are individual file uploads under "From Web Browser" which can take a long time with lots of files or use the Java "Upload Applet" that is very easy to drag and drop files to upload.

Step 7. Check you files after upload and send leaders an email if you have errors or difficulty during process. Response time depends on issue.
